Project SEE

Matthew James Pitsicalis

Deploying Infrastructure & Branching into Cybersecurity.

Raleigh, North Carolina, United States

Summary

I'm a 21-year-old Linux geek based in America with a strong focus in reverse engineering. I maintain scripts for various projects, and work on infrastructure.

In my free time, I indulge in maintaining infrastructure, ricing, hardware mods, gaming, creating Odysee exclusive content, and coding personal projects. I'm dedicated to becoming a pentester, and I am currently exploring more around the stacks in pursuit of my goal.
